

RIDES is a hands-on science, technology, engineering, and math program for K-8 teachers. TRAC introduces 7th-12th grade students to a wide variety of career opportunities in the field of engineering and teaches students how to apply math and science concepts to help identify and resolve engineering barriers in the transportation system. Each participant will receive a curriculum guide (aligned with state math and science standards) and a trunk of resources to share with another participating teacher from your school. The two-day training begins at 8:00 a.m. and ends at 3:30 p.m. each day; dress is casual. Due to the number of teachers requesting training, teachers will only be able to participate in one RIDES training.

In order to receive the curriculum, resource trunk, and certificate of attendance, participants must attend BOTH days of training. We also require the principal's signature granting permission for teachers to attend and utilize the program. To register, complete this form, and return it signed to the email address at the bottom of the application.
